

FAIR Data Infrastructure for computation

Mapping out the Space of Density Functionals

Nathan Daelman

José M. Pizarro, J.F. Rudzinski, L.M. Ghiringhelli, M. A. L. Marques, S. Botti

Motivation

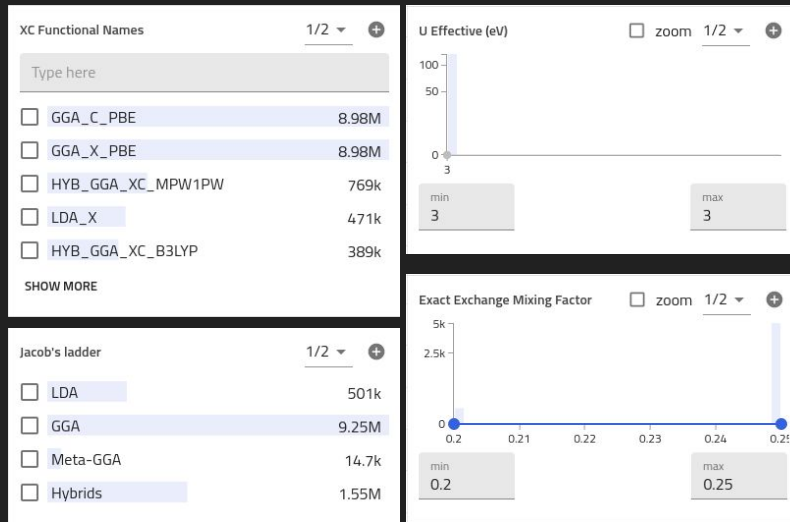

Density Functional Theory in

- over 12 M entries
- 88 subtypes registered

Heterogeneity: boom or bane?

- Analysis: insights in relevant physics
- Benchmarking

Interoperable BUT zoo of functionals

Need for a Knowledge Graph

LibXC

- basis for NOMAD XC Functional naming convention
- library for evaluating (semi-local) functionals
- supported by over 20 *ab initio* packages
- v5.2.3 contains 671 entries
- **not a database!**

First Step: FAIRifying

- already **A**ccessible
- make information **F**indable
- *graph-based* paradigm: functional descriptors and *connections*

XC Functional Names 1/2 +

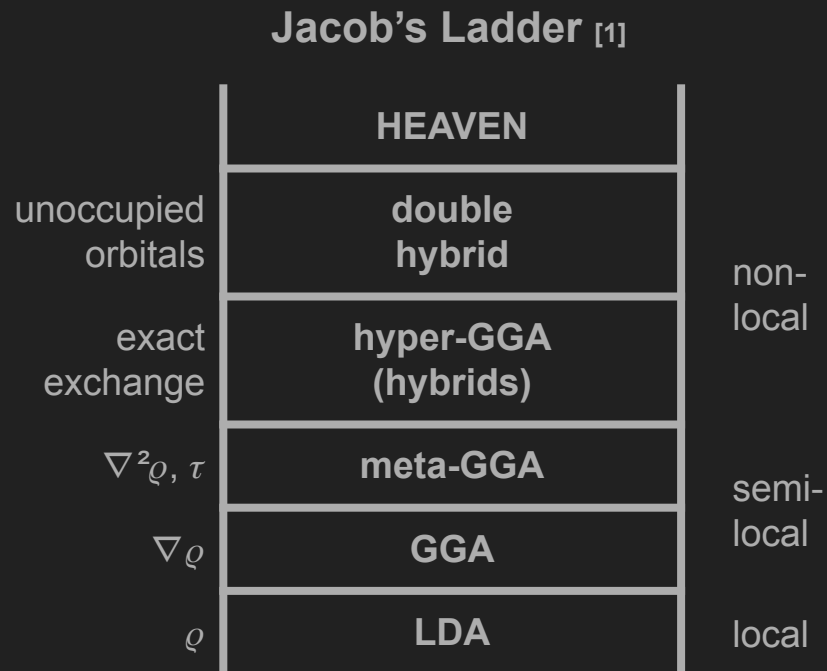

Type here

<input type="checkbox"/>	GGA_C_PBE	8.98M
<input type="checkbox"/>	GGA_X_PBE	8.98M
<input type="checkbox"/>	HYB_GGA_XC_MPW1PW	769k
<input type="checkbox"/>	LDA_X	471k
<input type="checkbox"/>	HYB_GGA_XC_B3LYP	389k

Adding References

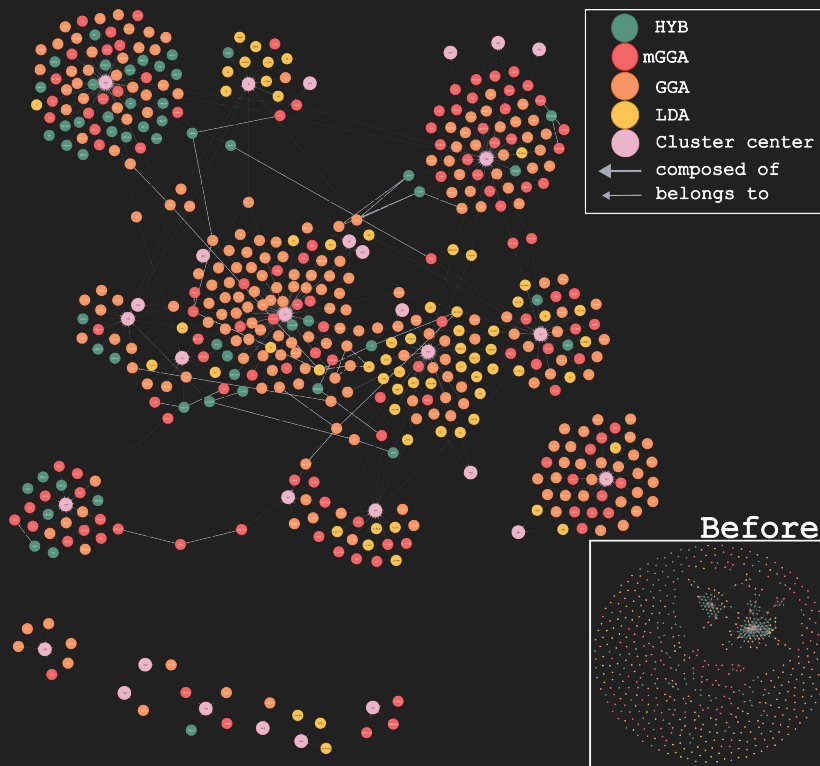

Add structure via references

- 1st order: 701 (see figure)
- 2nd order: 5927

Collective consciousness of the community: link what is proper

Clustering

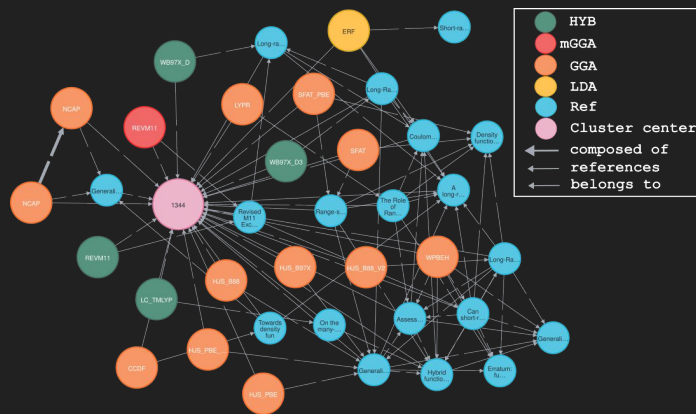

Approach

- create references subgraph
- apply Louvain clustering
- connect cluster centres back to functionals:
● → (●) → ●●●●

Semantics: do these clusters have meaning?

Adding Semantics: PageRank

Interpreting a cluster's theme

- Articles in this case: 19
- Articles in the whole set overall: 5937
- Filter via the PageRank algorithm

Google ^[1]

Ranked reading list:

- most talked articles
- most representative for a theme

[1] <http://infolab.stanford.edu/~backrub/google.html>

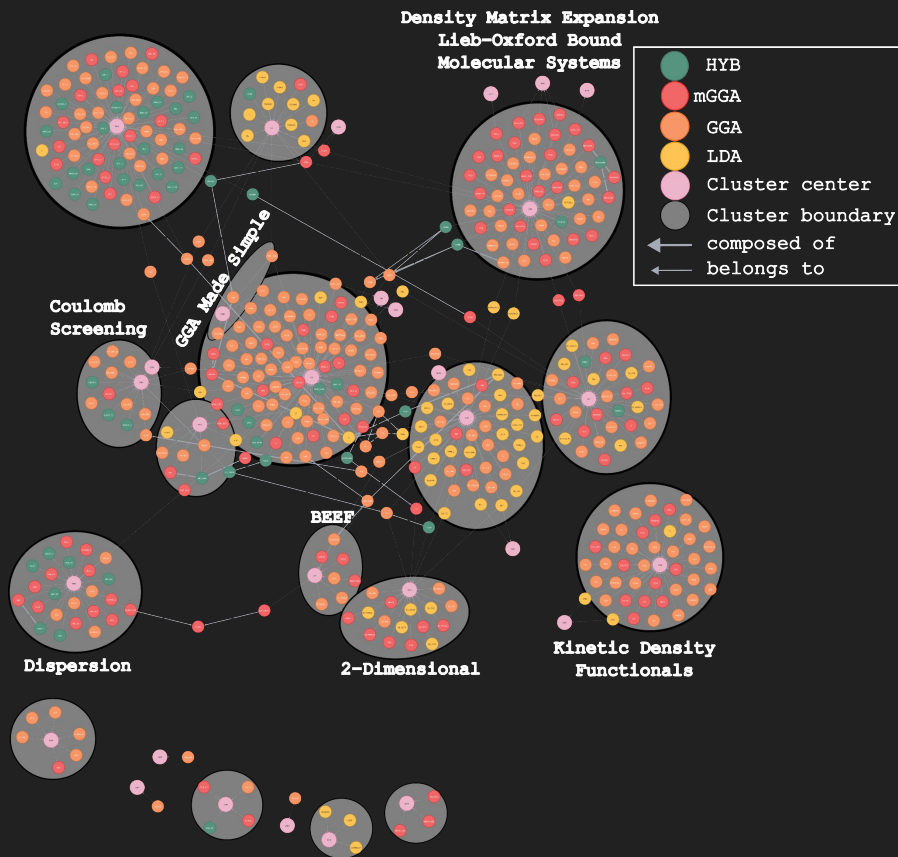

Adding Semantics: PageRank

PageRank	Publication	Authors
1.02	<i>Coulomb</i> -attenuated exchange energy density functionals	PMW Gill , RD Adamson, JA Pople
0.63	Hybrid functionals based on a <i>screened Coulomb</i> potential	J Heyd, GE Scuseria M Ernzerhof
0.60	A long-range-corrected time-dependent density functional theory	Y Tawada, T Tsuneda , S Yanagisawa
0.35	Assessment and validation of a <i>screened Coulomb</i> hybrid density functional	J Heyd, GE Scuseria

reduce to **max. 4 articles / cluster**
so approx. **80 in total**

Adding Semantics

Categories

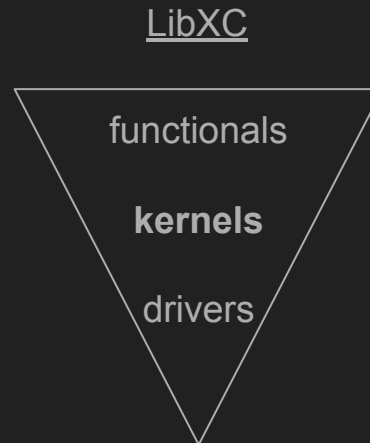

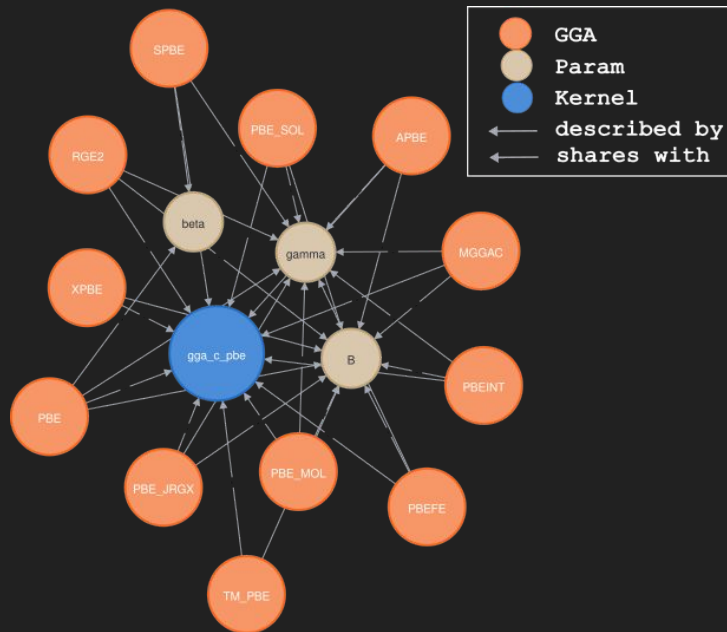

- Coulomb Screening
- 2-Dimensional
- Kinetic Density Functionals
- Dispersion
- BEEF / VdW

Thematic clusters + connections

- Density Matrix Expansion
- PBE and co.

Adding Semantics: Common Parameters

Semantics

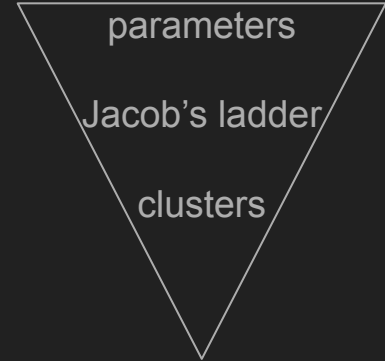

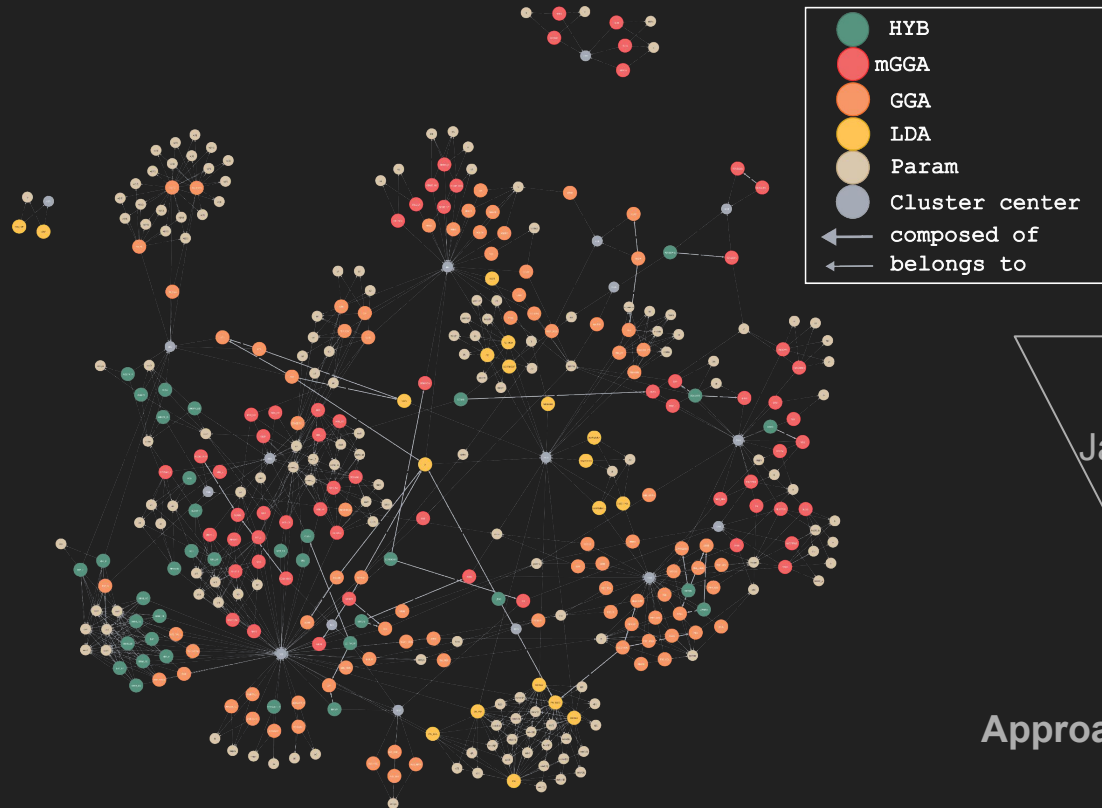

- described by: re-parametrization
- shares with: more common variables

Each **Param** has a story behind it

Fig.: PBE correlation kernel neighbourhood

Adding Semantics: Common Parameters

Approaches by question

Conclusions

Utility of **FAIR** knowledge bases / graphs

Future work

- make knowledge accessible to NOMAD users
 - composition
 - re-parametrization
 - clusters (categories, families)
 - extensions
- extend knowledge base
 - more semantic *references*: extract the *why*?
 - include other repositories? e.g. libvdx, Quantum ESPRESSO
